The My Tree Project grew from 11-year-old Maxim sitting and reading in his mulberry tree. This made him feel creative and energetic. He told his grandmother Lara Lamnek and from this grew the idea of the My Tree Project, an endeavour taken up and managed by WACRA.

In 2021, primary school students sowed seeds to grow trees and understory. On Schools Tree Day (29 July) this year they planted the seedlings at their school and in the community. They also made artworks about the meaning of trees.

The My Tree Project enables children to be creative and play an active role in dealing with the serious local impact of our environmental situation.

The project is sponsored by SA Water.
